How to import the project?

1- Unzip the "Task Template 2021" by right click on it and select "Extract here".

2- Copy the extracted folder into the "fos_cygwin/FOS_CODES" folder

|			
bin	4/24/2021 11:47 PM	File folder	
dev	2/8/2018 5:28 PM	File folder

unzip.exe	2/21/2017 3:29 PM	Application	164 KB

3- In eclipse:
- Right click in the project explorer
- Choose 'Import Project'

- Choose 'Existing Projects into Workspace'

- Browse for the path of the extracted folder
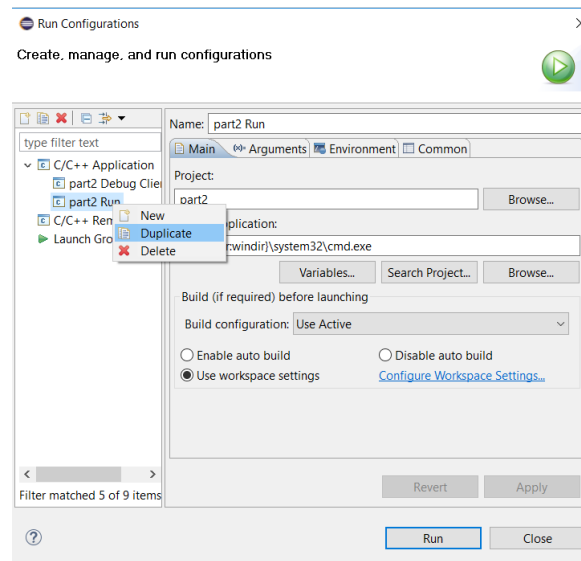

- Click 'Finish'

Now the project is added, we need to adjust the running configurations

- From the run, choose 'Run Configurations'

- Right click on 'part2 Run' → Duplicate

- Rename it to be 'project Run' and choose the project path
- Click 'Apply' → 'Run'
